James York

Founder, "Worry and Peace"

James York is the founder of Worry+Peace, with +32k hours of experience, he is a frequent commentator and advocate of what he calls #TeamInsurance.

James is an expert in insurance innovation, product management, project management, content marketing and a business development specialist. When he's not doing insurance, he's writing short stories, blogs and idealistic essays, making his first board game, walking his dogs and spending time with his family and friends.

Dr Clemens Frey

Actuary (DAV), CERA, Partner, PwC Germany

Clemens Frey has over 15 years experience in the (re)insurance industry, audit and consulting. He has worked for Munich RE, KPMG, The Boston Consulting Group and PwC, and gathered broad experience in actuarial topics, risk management and strategy consulting. He has supported the development of Solvency II and Swiss Solvency Test since the early 2000s, when he has been a member of diverse actuarial working groups of the German Actuarial Association (DAV), the European Actuarial Association (AAE) and the IAA. Clemens has published various articles and books on Solvency II. His current focus areas are economic and regulatory risk models, incl. internal stochastic and simulation approaches, actuarial audit and consulting wrt. valuation (Local GAAP, Solvency II, IFRS17) and pricing.

Simon Dejung

Senior Underwriter, Specialty Line Engineering, SCOR Reinsurance

Senior Underwriter Engineering, holds a M.Sc. in Biochemical Engineering from the ETH in Zurich and an MBA from SUPSI. Simon was programmer and commissioning engineer for ICS/SCADA control systems in the pharmaceutical industry and project manager for "energy from waste power plants". He holds a certificate for cyber risk management. Simon analyzes terms & conditions and correlated the cyber exposure in engineering portfolios (engineering, power, energy) and contributes to a working group from IMIA (imia.com) about cyber exposure in technical risks. The results will be published October 2016 including an up to date cyber exclusion clause for property lines with a write-back option.
